## 커널소스 - 프로젝트에 로드하고 수정X

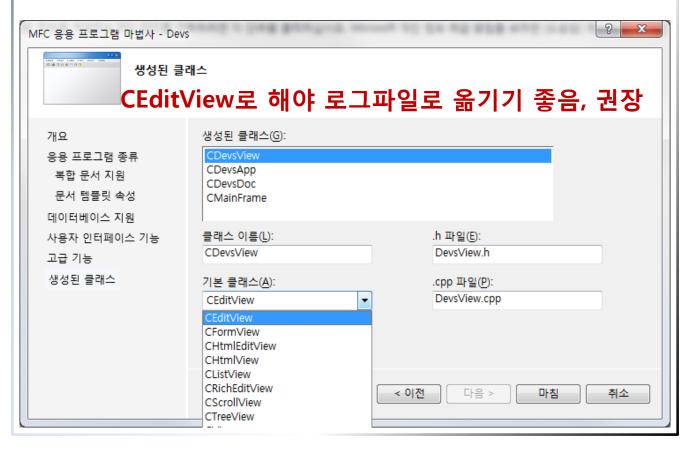

| h genr.h    | h Process.h     |
|-------------|-----------------|
| h Transd.h  | C+→ genr.cpp    |
| Process.cpp | C+++ Transd.cpp |

사용자 정의 모델 - 프로젝트에 추가하는 모델

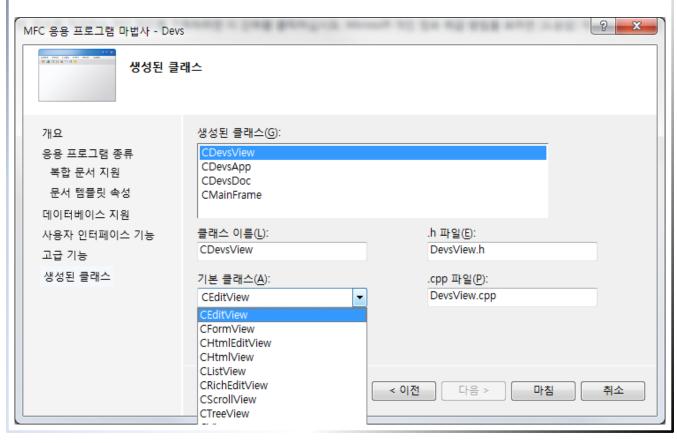

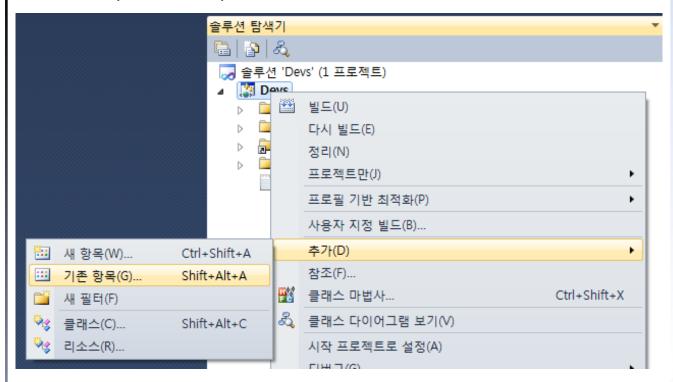

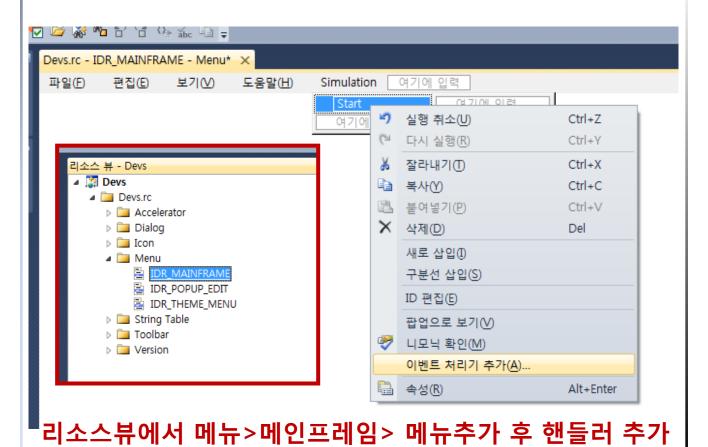

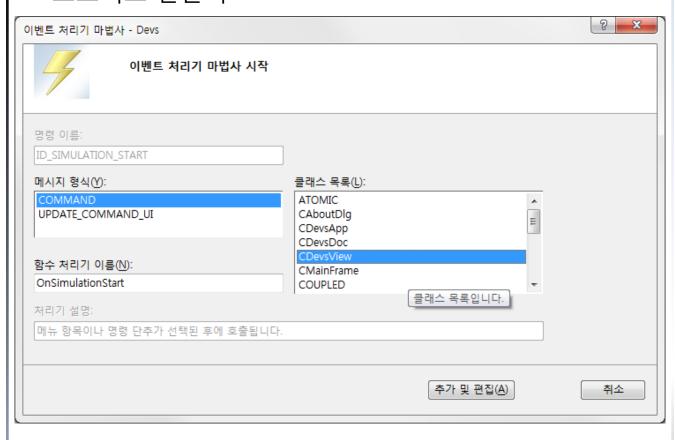

#### 라이브러리 파일 모두 소스폴더에 붙여 넣기 후 추가 권장

```
□// CDevsView 메시지 처리기

#include "Tglobal.h"

□void CDevsView::OnSimulationStart()

{

    // TODO: 여기에 명령 처리기 코드를 추가합니다.
    MakeSES();
    StartSimulation();

}
```

추가된 핸들러위에 tglobal.h 포함, 내용으로 MakeSES(); StartSimulation(); 추가

# 3. 사용자 모델 만들기 (예제 심플아키텍처) **Processor** passive out in busy Genr out, stop busy passive Transd arriv out active passive solved
